Experience

Seriesmate | seriesmate.com 2021-Present

Co-Founder & Software Engineer

Built Seriesmate from scratch with Flutter and Dart, owning the iOS and Android app end to end from architecture and feature development to launch. I continue to manage App Store and Google Play releases, production maintenance, and ongoing improvements based on real-world usage.

Integrated the LiveKit Flutter SDK to develop WebRTC-based real-time voice rooms, enabling live audio communication between users.

Developed and maintain the Supabase backend for core features including user profiles, ratings, and collections. Shipped discovery features and maintain localization across 16 languages.

Use Codex and Claude Code in my daily Flutter workflow to implement features and investigate bugs. Review generated changes and verify them with builds before release.

Ketencek IT 2020-2021

Project Coordinator

Joined as an intern and progressed to coordinating ERP inventory integrations for online stores during COVID-19. Worked directly with fashion and sportswear clients, including Boyner and Hummel, to gather requirements and coordinate delivery with developers.

Supported warehouse software for D'S Damat through demos, installation, user training, and issue resolution.

Core Competencies

Mobile Development: Flutter, Dart, Cross-Platform Mobile Development
Real-Time Communication: LiveKit Flutter SDK, WebRTC
Backend & Data: Supabase, PostgreSQL, REST APIs
Production & Release Management: App Store, Google Play, Production Debugging, Git
AI-Assisted Development: Codex, Claude Code
Engineering & Product Ownership: End-to-End Ownership, Product Thinking, Results-Oriented Delivery

Education

Muğla Sıtkı Koçman University 2018 - 2020

Associate Degree in Computer Programming
